Volume 62 (1989)

PHYSIOLOGY AND BIOCHEMISTRY

Regulation of acid phosphatase by gibberellic acid in embryo-less half-seeds of wheat
by D. Saluja, S. Mishra, S. Lall and R.C. Sachar (Delhi, India) 1–9

Purification and partial characterization of soluble α-mannosidase isoforms from sunflower (*Helianthus annuus* L.) hypocotyls
by R. López-Valbuena, J. Jorrín, A. Polanco and M. Tena (Cordoba, Spain) 11–19

Evidence that H^+ extrusion in *Elodea densa* leaves is mediated by an ATP-driven H^+ pump
by M.T. Marre, F.G. Albergoni, A. Moroni and M.C. Pugliarello (Milan, Italy) 21–28

Effect of chitosan on the hypersensitive reaction of bean to alfalfa mosaic virus
by H. Pospieszny and J.G. Atabekov (Moscow, U.S.S.R.) 29–31

Production of ethylene and ethane by callus tissues of *Daucus carota* L. in presence of 2,4-disubstituted phenols
by R.K. Maitra and S.P. Sen (Bethesda, MD and Kalyani, India) 33–35

Acid phosphatases from *Lupinus angustifolius* and their immunological relationship with grass acid phosphatases
by I. Lorenc-Kubis (Wrocław, Poland) 37–43

Jasmonic acid-dependent increase in the level of vegetative storage proteins in soybean
by J.M. Anderson, S.R. Spilatro, S.F. Klauer and V.R. Franceschi (Raleigh, NC and Pullman, WA) 45–52

Changes in pectic and hemicellulosic polysaccharides during acid pH-induced growth in pine hypocotyl segments
by E.P. Lorences, J.L. Acebes, G. Revilla and I. Zarra (León, Spain) 53–61

Changes in spinach plasmalemma after gibberellic acid treatment
by P. Crespi, M. Crèvecoeur, C. Penel and H. Greppin (Geneva, Switzerland) 63–71

Characterization of the major proteins from *Vitis vinifera* seeds
by E. Gianazza, G. Tedesco, P. Villa, A. Scienza, G. Cargnello, P.G. Righetti and A. Osnaghi (Milan and Asti, Italy) 73–81

GENETICS AND MOLECULAR BIOLOGY

Flavonoid compounds from pollen and stigma of *Petunia hybrida*: inducers of the *vir* region of the *Agrobacterium tumefaciens* Ti plasmid
by R. Zerback, K. Dressler and D. Hess (Stuttgart, F.R.G.) 83–91

The chloroplast genome of *Beta vulgaris* L.: structural organization and transcriptional activity
by E.V. Kiseleva, N.A. Dudareva, A.E. Dikalova, N.B. Khristoliubova, R.I. Salganik, P.P. Laktionov, V.V. Roshke and E.F. Zaichikov (Novosibirsk, U.S.S.R.) 93–103

CELL AND TISSUE STUDIES IN VITRO

Mass production of viable protoplasts from *Macrocystis pyrifera* (L.) C. Ag. (Phaeophyta)
by B. Kloareg, M. Polne-Fuller and A. Gibor (Santa Barbara, CA) 105–112

Obtention of in vitro flowers from thin epidermal cell layers of *Petunia hybrida* (Hort.)
by M. Manorama and T.T. van Kiem (Gif-sur-Yvette, France) 113–121

Effects of inhibitors of polyamine biosynthesis on growth and organization of meristematic centers in *Petunia* protoplast cultures
by R. Kaur-Sawhney, A. Chackalamannil and A.W. Galston (New Haven, CT) 123–128

Adventitious root and shoot regeneration in cultured explants of mature black spruce
by R.H. Ho (Guelph, Canada) 129–135

Environmental effects on growth of tissue cultures of a woody solanum species (*Solanum laciniatum*)
by H. Glock (Göttingen, F.R.G.) 137–143
Corrigendum 145

PHYSIOLOGY AND BIOCHEMISTRY
Preliminary study of the inheritance of temperature stress proteins in barley (*Hordeum vulgare* L.)
by N. Marmiroli, C. Lorenzoni, A.M. Stanca and V. Terzi (Lecce, Picenza and Fiorenzuola d'Arda, Italy) 147–156
Effect of leaf development and temperature on a foliar storage glycoprotein from *Poncirus trifoliata* (L.) Raf.
by W. Witt, C.S. Mauk and G. Yelenosky (Gainesville, FL, Raleigh, NC and Orlando, FL) 157–163
Reassessment of the toxic glycoprotein isolated from *Rhynchosporium secalis* (Oud.) Davis culture filtrates: physicochemical properties and evidence of its presence in infected barley plants
by C. Mazars, M. Rossignol, P.Y. Marquet and P. Auriol (Toulouse, France) 165–174
Occurrence of L(+)-tartaric acid and its formation from D-gluconate or D-*xylo*-5-hexulosonate in bean leaf (*Phaseolus vulgaris* L.)
by K. Saito and F.A. Loewus (Kyoto, Japan and Pullman, WA) 175–180
In vitro cleavage of the *Lathyrus nissolia* isolectins
by P. Rougé, D. Père, Y. Bourne and C. Cambillau (Toulouse and Marseille, France) 181–189

GENETICS AND MOLECULAR BIOLOGY
Effect of light conditions on the mRNAs for the two subunits of Rubisco in photomixotrophic tobacco cells. Comparisons of wild type with a Rubisco-deficient mutant
by J.L. Prioul, A. Nato and B. Nguyen-Quoc (Orsay, France) 191–197
Initiation of translation of the β-glucuronidase reporter gene at internal AUG codons in plant cells
by J.J. Putterill and R.C. Gardner (Auckland and Hamilton, New Zealand) 199–205
Functional analysis of the upstream regions of a silent and an expressed member of a family of wheat seed protein genes in transgenic tobacco
by N.G. Halford, J. Forde, P.R. Shewry and M. Kreis (Harpenden, U.K.) 207–216

CELL AND TISSUE STUDIES IN VITRO
The effect of different temperatures on the growth, lipid content and fatty acid composition of *Theobroma cacao* cell suspension cultures
by R.R. Leathers and A.H. Scragg (Sheffield, U.K.) 217–227
Cell divisions in pollen protoplast culture of *Hemerocallis fulca* L.
by C. Zhou (Wuhan, China) 229–235
Callus formation and plant regeneration from rice protoplasts purified by density gradient centrifugation
by K. Masuda, A. Kudo-Shiratori and M. Inoue (Akita, Japan) 237–246
Culture of immature embryos of coconut, *Cocos nucifera* L.: callus proliferation and somatic embryogenesis
by S. Karunaratne and K. Periyapperuma (Lunuwila, Sri Lanka) 247–253
Cytological analyses of in vitro somatic embryogenesis in *Brimeura amethystina* Salisb. (Liliaceae)
by A. Cavallini and L. Natali (Pisa, Italy) 255–261

GENERAL
Interspecific protoplast fusion in *Nicotiana* provides evidence for a mitochondrial determinism of oligomycin-resistance
by J. Durand and H. Harada (Orsay, France and Ibaraki-Ken, Japan) 263–272
Subject Index Volume 62 273–275
Author Index Volume 62 277–278
Contents Volume 62 279–280
